

# Definition of Done

## General rules

Being able to compile with no errors

A few warnings may be accepted if you explain them well.

If possible, create test or put the test creating in the Product Backlog with high prio.

In-code comments for everything that could need an explanation.

## Testing

All written tests have been run with positive results.

Necessary function tests have been implemented.

.apk

- Compiled .apk-file must exist
- The .apk-file must be able to run without errors on devices GalaxyNexus, HTC One X or AVD.

## Git

Well-written commit message

Use tag properly

Merge with the developer-branch
