Sprint 03 Planning Meeting

Part One: What will be done this Sprint?

GpsActivity will hopefully have a test class. A developer manual and user guide will be written. It should be possible to chat with another user when the sprint is over. A few settings will be implemented. Javadoc will be written for most on the methods. Be able to create chat rooms and place a shaded circle on the map.

Part Two: How will the chosen work be done?

GpsActivity will be refactored and altered to simplify testing and improve functionality. The missing functions on the server will be written. A huge part of this sprint will be spent on chat rooms interacting with the map. The previously mentioned workload will be prioritized and if there is time left after this it will be spent on adding methods on the settings activity.
