

Sprint 03 Backlog			
Description			
The Sprint Backlog is the set of Product Backlog items selected for the Sprint plus a plan for delivering the product Increment and realizing the Sprint Goal. The Sprint Backlog is a forecast by the Development Team about what functionality will be in the next Increment and the work needed to deliver that functionality.			
Story/task			
Description	Estimate	Actual	
Automated Tests			
Auto-tests for Map view	5	6	You are not allowed to instrument against com.google.android.maps as that is another application. That is why you are getting the security exceptions. There is no way around it.
Database handling			
Research and planning for what kind of database storage	4	4	
Forcing user to choose nickname at start	2	2	
Sending nickname/regid to server SQL DB	4	4	
Creating java-classes for handling deviceids/messages	4	2	
Refactoring GCM Server class	5	3	
Creating test webinterface for adding users to SQL DB	1	1	
Creating test webinterface for deleting users to SQL DB	1	1	
Research in eventually changing from DERBY to SQLITE	1		moved to next sprint
Database tables designing	2	2	
Adding SQL output in test web interface	1	1	
Refactoring SQL connection functions, etc	2	2	
Creating a design template/guidelines for application			
Research Google Android design guidelines	4		moved to next sprint
Design template	2		moved to next sprint
Creating icon images	3		moved to next sprint
GpsActivity			
If GPS is not available, use network-provider	1	1	
Place a shaded circle on a specific location	4	4	
(Prepare)Place a shaded circle on map when creating a chatroom	5	5	
Different colours on the circles depending on your location	3	3	
Chatscreen			
Format chatroominfo correctly before sending	2		moved to next sprint
Send chatroominfo to server	3		moved to next sprint
Screen with list of rooms	1	1	
Be able to create a pseudo-room	2	3	
Make a room private(use a pw)	2		moved to next sprint
Making the chatinterface more userfriendly	1	1	
Making it possible to see the latest message in chatlog while input	3	4	
SettingsScreen			
Change theme	4		moved to next sprint
Make user "invisible" for others on the map	2		moved to next sprint
A slider to set how far away you are able to see where other users are	6		moved to next sprint
Change nickname	1		moved to next sprint
Changing nickname should be stored locally	3		moved to next sprint
Other			
Forcing nickname choosing at start and sending to serverDB	2	2	
Writing javadoc	3	5	Will need some more work in upcoming sprints
User manual	2	3	
Developer guide	2	2	Will need some more work in upcoming sprints
Forcing user to choose nickname at start	2	2	
Sending nickname/regid to server SQL DB	4	4	
Creating java-classes for handling deviceids/messages	4	2	
Refactoring GCM Server class	5	3	
Creating test webinterface for adding users to SQL DB	1	1	
Creating test webinterface for deleting users to SQL DB	1	1	
Research in changing from DERBY to SQLITE	1	1	
Database tables designing	2	2	
Adding SQL output in test web interface	1	1	
Refactoring SQL connection functions, etc	2	2
