Sprint 02 Planning Meeting

Part One: What will be done this Sprint?

We will try to fix the problems in the code we have encountered, this involves adding missing methods and try to get that map to be displayed properly on phones. We will continue to research GCM and our goal is to have a working server after this sprint. We will begin to code the application-part that is needed to communicate with GCM. Refactoring and other necessities to make the master branch work as it should.

Part Two: How will the chosen work be done?
