Project-description

Chosen and described project:
ShutApp is an application that gives you as a user, the possibility to chat with people within close distance to you. You will be able to look at a map and see all the chatrooms, both those that are available for you to join and those which you are out of range of.

License-motivation:
We chose to use GPL mainly because we didn't want to limit what code/libraries we can use in our project.

List of features for the project:
- Send message from a phone to another.
- Being able to see available chatrooms on a map
- Login system

Hopefully we will be able to make several people chat with each other at the same time.

Project Roles:
Product Owner: Mattias Herzog
Scrum Master: Hampus Lilja
Developer: Tomas Arnesson, Hampus Lilja, Mattias Herzog, Mathias Dosé

Lista de roller ni har i ert projekt (utvecklare, projektledare…..):
Product Owner, Scrum Master, Developer
