Sprint 01 Planning Meeting

Part One: What will be done this Sprint?

Produce and update the "Product Backlog" and decide what should be done after this sprint

What are the "Sprint Goal" for this sprint:

> The Goal for this first sprint is to have a basic layout with more than one Activity and a couple of tests that confirms that buttons and text works as it should.

Part Two: How will the chosen work be done?

Mathias Dosé will be in charge of completing a basic layout with a few Activities linked to each other.

Mattias Herzog will work with a basic GPS-Activity with the ability to mark your current location on a map.

Hampus Lilja will be in charge of setting up a functioning GIT-environment and will make sure we have got the required documentation for the sprint. In addition to this he will also be writing test-classes to some on the methods we will create.

Tomas Arnesson will focus on research for GCM implementation and how to adapt correct JSON responses from server. In addition creating a new Java project for the 3rd-party server role. Also register the group at Google Developers, for access to relevant services and APIs.
